

Features and Benefits

- Conforms to API 1004 and EN13317/EN14596
- Manhole Covers are ideal for use in new construction, or as a replacement cover for all DOT406 and older MC306 cargo tanks
- They are precision designed and construction limits leakage in a roll-over situation to less than one litre, as required by standards.
- Nitrile Seals
- Each manhole features a versatile 10" aluminium vent, which is set up open at less than 3.63 PSI, and if needed can be safely and easily disassembled for field repair.

Use Cause

- Manholes include one pressure/vacuum vent.
- Cover can be made self-latching in the field in minutes by adding out Latching
- Manhole cover include mounting holes for vapour vents, overfill detection sensors and Dip Socket

General Specifications

- Materials: Aluminium and MS
- Working Temp. -40°C to +70°C
- Weight 3.5 Kg
